PORTFOLIO DESCRIPTION AND INVESTOR SUITABILITY

The portfolio follows a risk-averse investment philosophy of purchasing companies trading at the largest discount to their intrinsic value. The portfolio is designed to match or beat the benchmark returns, through a full business cycle, but to achieve it at a lower volatility. The portfolio ranges between 10 and 100 equity holdings. This portfolio is suitable for investors who would like to diversify their portfolio, are in pursuit of medium long-term returns, and can withstand possible short term turbulence and require little to no income in the short-term from their investment. In order to protect wealth before recession, the portfolio may be in 100% cash.
